We're still an evolving network with a strong backup not only financially but also with the absolute requirements for each domains of business functions we operate by our collective investment funds from members – investors at arcmoney.cc; We execute this with a limited and determined portfolio manner by complete confidence on our decade grown experience in market and technical risk mitigation knowledge along with the scale of skill set to play a keenly safe role, focusing to enhance our member's trust by consistent profitability from our network at the highest responsibility.

ABOUT ARCMONEY – Conceptive Focus:-

We've a clear and strong conceptive focus on the tomorrow's (near futuristic) business structure to be cult-in soon with a long-term supportive measures in maintaining our stability to sustain as the pioneer in concepts of online finance and investment concepts, carefully structured from a thought process to business process after several

stages of experiments and real-time testing results achieved in a minimum of 95% viability to sustain with stable profits all throughout the business calendar of years to come.

Having online cryptofinance as our major conceptive focus point towards the near future product of lending industry, at present we are into the course of adopting a strong business policy to avoid dents in time after instances. We are much glad in keeping a note here that we've started operating a complete digital lending system from with all technical and security measures in place to serve appropriate as promised as instant services to our customers.

About ARCMONEY – Business Schema:-

We're one among the few unique online business networks to have a clustered point of business transparency as much as possible to all our members-investors, in what we do and how we operate with no boundaries as an independent network. We've been committed to realistic and timely profit-making strategies with our extended services like crypto-loan, crypto-mining, intra-day trading and other new launching projects which are currently under development.

We do not engage our investors capital funds to any sort of fancy advertisements or high paid promotions for the only cause of getting in further more investments; Rather we gather only interested and like-minded individuals who are willing to contribute as members of our network which is meant for serious business by serious investors with a measures risk mitigation policies in place. We keep ensuring our members' profitability by realistic (practically possible) long-term returns on their contributed investments by stable daily profits with an add-on choice of compounding daily returns from 0% to 40% to attain a lump sum returns along with their principal withdrawal at the end of their investment term.

UD PROJECTS – ASTROMONEY:-

Astro-Money is all about futuristic market predictions for intra-day trading featuring at most sharp results as accurate as a pre-monition of tomorrow's market chart in your pre-ordered prediction reports.

We offer an ultimately unique service as the name stands here as "ASTRO-MONEY", where our financial astrology experts derive the calculative planetary influence in each timeline, up on each conceptive and substantial elements of market listings at Stock Market, Forex, and Cryptocurrency. We've practiced – experimentally succeeded with all this calculus with our financial astrology experts who are expertise in predicting any market entity or elements by their decade grown conceptive experience out of in-depth practically possible financial forecasting analysis too. We're making it to this allied campaign of service in ARC MONEY as a pilot version of our main frame project planned to launch on January 2022.

UD PROJECTS – COINLOAN:-

This is again a similar service platform to Crypto loan mentioned with here above, being a different vertical of lending digital FIATs to financial technology backed online projects especially for establishment and to support on asset reconstruction necessities to project owners. COINLOAN is actually completed with the development part just a day before this presentation and likely to be launched on August 18, 2021 post accomplishing the testing parameters for both technical responsiveness and market viability.

OD PROJECTS – ATSS:-

ARC Trade Support Services comprises of a simple and instant responsive trading application that enables to operate multiple market trades in a single user login with support to seek loan, standard investment returns as a clustered component of all other services of ARCMONEY including accurate tips on specific element or specific market which is being operated by our user. We are in keen attentive plan to make a stable revenue stream on this application by fixing up a minimum commission on each transactions being done by the user. Additionally as an extra mileage we are implementing the concept of window insurance for each trading session which allows the user to get rid of a huge loss by a mere compensation to ensure a fair experience even at darker days of market. Also our auto trade assistance is going to be the game changer to all intra-day traders who prefers a user friendly trading application as we are keenly focusing to add on a sort of auto pilot intelligence to suggest and forecast the user on any executions being done even when the auto-pilot mode is turned off.

OD PROJECTS – ARC X:-

A single window currency exchange system enabling users to exchange any verticals of currencies to other like from Perfect Money to Bitcoin Cash or from EIFI Token to Payeer USD as far as can be made as a best simple example to bring in the concept here. This exchange system is going to be much unique as it gives pre-alert to user on the profitable exchanges could be done whenever user selects an available currency type to be exchanged to any other and hence we guarantee user's profitability along with our exchange commissions as earning rewards.

OD PROJECTS – ARC S:-

ARC S – stands for ARC Swing which is a futuristic long-term scaling up process of bringing up a globally working payment system that allows the users to make global fund transfers in all foreign exchange-able currencies right to and from their bank accounts at a single window operation. Again the most familiar part here would be the revenue factor which is based on the sender currency value in global market and receiver currency value in global market.
